I will DEVELOP

ASL designs products specifically for those who can not access their environment through conventional means. Our products and designs are a direct result of the needs of those we serve. Our goal has always been independence and equal rights for those we work with.

Standard Features

- MK6i electronics can change the chair's performance as the child's experience and competence grow
- 10" rear tires minimize the chair's seat to floor height allowing the child to fit right into his/her environment which facilitates interaction with other kids his/her age
- 6" semi pneumatic, long-life casters
- Clutch release for true free wheeling makes it possible to disengage the motors allowing for the parent or care giver to push the chair around

Highlights

- 25 degrees of manual tilt is standard
- Flip down push handles for convenient chair management
- Low seat to floor height for access to a preschool or kindergarten table
- Removable top frame for help with transportation

Growth

- Growth capability is an essential feature for kids
- Available seat sizes from 6" x 6" to 12" x 12"

Seating

- Seat was designed to accommodate most seating and positioning systems
- Two wheel locks are on every chair to ensure the child's safety
- Flip down stroller push handles add to parent or care giver comfort when pushing the chair around
- The low seat to floor height of 13" allows the child to fit right into his/her environment and further facilitates interaction with other kids his/her age
- Adjustable height arms with lock down mechanism ensures the child's arms to be most comfortably positioned
- Adjustable angle and fold down back ensures the child's back to be most comfortably positioned and for ease of transportation
- Available with 90 degree swing away footrest or one piece center mount angle adjustable foot board ensuring the child's legs to be most comfortably positioned
