

Amyotrophic Lateral Sclerosis (ALS):

Clients who are diagnosed with ALS have rapidly changing needs. We feel that it is very important for these clients to stay connected with mobility, seating, computer and communication from their wheelchair, or even while in bed. ALS has a program in place to exchange drive controls for clients as long as their needs change. Below are some of the products that we have specifically designed or recommend for clients with the diagnosis of ALS.

ASL 102
UNO Single Switch Scanner - Bluetooth

ASL 107
ATOM
ATOM Two Switch Fiber Optic Array

ASL 108
ATOM
ATOM Four Switch Fiber Optic Array

ASL 110
FUSION
FUSION Proportional - Digital Head Array

ASL 121S
ATOM
ATOM ALS Package Expandable Drive Control System

ASL 122
FUSION
FUSION ALS Package Proportional and Digital Drive Control System

ASL 128
Molecule Joystick

ASL 130
Micro Extremity Control

ASL 138
Extremity Control Joystick

ASL 314
Ultra Light Switch

ASL 314R
Ring Mount for Ultra Light Switch

ASL 545E
Tecla E Bluetooth Interface
